Allowable Subject Matter

1. Claims 1, 2, and 4-14 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art, Maritzen et al. (US 5,987,429), teaches a method and system for determining total landed cost of a purchase based on the initial cost of a seller item for an inter-country transaction that includes determining from a database trade costs associated with the purchase, adding the trade costs to the initial cost resulting in the total landed cost, and displaying through a network the total landed cost.

The prior art lacks the teaching of determining trade costs associated with an inter-country purchase by determining customer type to ascertain if a special purchase price applies and determining if any trading agreements apply which govern the purchase price and adjusting the trade costs accordingly.

The limitations lacking in the prior art, in combination with the other limitations clearly claimed for patent, are novel and unobvious.

The foreign prior art, Kim (WO 0197122), teaches a network-based means for trading products and services wherein a central management device acts as a mediation system for transactions.

The foreign prior art lacks the teaching of determining trade costs associated with an inter-country purchase by determining customer type to ascertain if a special

purchase price applies and determining if any trading agreements apply which govern the purchase price and adjusting the trade costs accordingly.

The limitations lacking in the prior art, in combination with the other limitations clearly claimed for patent, are novel and unobvious.

The non-patent literature, Pearson (*European Business Journal* article), teaches a method for enhancing international trade wherein an interactive system using one or more media and a database is used to effect a transaction via marketing.

The non-patent literature lacks the teaching of determining trade costs associated with an inter-country purchase by determining customer type to ascertain if a special purchase price applies and determining if any trading agreements apply which govern the purchase price and adjusting the trade costs accordingly.

The limitations lacking in the prior art, in combination with the other limitations clearly claimed for patent, are novel and unobvious.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
